

spine
2" dia extruded aluminum available in powder coat painted finishes listed below. 200° lens provides 14% uplight.

diffuser
proprietary extruded frosted acrylic with 80% transmission and excellent LED diffusion.

LED module
premium architectural grade flexible LED PCB in 3000K, 3500K, or 4000K. (90+ cri standard). under normal operating conditions, the LEDs employed are rated for >50,000hrs L70 (6.8K) per IES TM-21 from LM-80 test data.

driver
programmable, UL class P, class 2, universal input (120-277v), constant current, 0-10v dimming, 1% minimum dimming level, PF > .9, THD <20%, protections include open and short circuit, overload and over temperature. remote driver enclosure standard. consult factory for distances over 33 feet.

mounting
satin white canopies with ultra-thin aircraft cables, field-adjustable at mini grippers located along T-slot in spine or ball grippers located at hubs. ultra thin silver braid power cord standard.

finish
select from 4 standard powder coat paint finishes listed below. additional 11 powder coats available for nominal setup fee. consult factory for RALs and custom colors

emergency
recommend use of inverter (by other).

spine

2" dia extruded aluminum available in powder coat painted finishes listed below. 200° lens provides 14% uplight.

diffuser

proprietary extruded frosted acrylic with 80% transmission and excellent LED diffusion.

LED

RGBW premium architectural grade flexible LED PCB combines architectural grade white LEDs with a 3-in-1 RGB LED to provide practical Nominal White Output at 1568 lm/board AND beautifully accented light with Excellent Color Consistency.

driver

Infinite color control, enabling stunning lighting effects with Constant Voltage LEDs for architectural lighting applications. Whether single color for accent, Tunable White for Circadian applications, or full color RGB for entertainment product solutions, these drivers provide flicker-safe dimming to 1% with DALI or DMX and allows you to create your color or dynamic show without an external controller. Additionally, these LED drivers work seamlessly with other controls, and intelligent luminaire elements.

mounting

5" dia. spun steel canopy in satin white is designed to mount to a 4" octagon junction box (by other). 6' tripod suspension of stainless steel cables attaches to reflector with field adjustable grippers that allow for exact AFF mounting heights. slip ring coupler at ceiling allows for easy wire connections. or select 12ft adjustable suspension. (drawing below)

finish

LED

high performance tunable white spec-grade LED modules for excellent circadian lighting effects. from 2700K – 6500K CCT and anywhere in between with beautiful uniform color blending. with 2 channel constant current architecture, this high performance LED module provides the versatility needed to bring color tunable white capability to any architectural application.

Calculation Table

Tests are for each element separately and must be "stacked" to represent single fixture
Consult factory for applications assistance

The application of a Light Loss Factor is required to:

- match the lumen output for the power module specified
- incorporate the increased lumen output due to LED/Driver upgrades
